Under carriages are designed to carry minimum friction, heavy load carrying capacity and manufacturing accuracies. We use round rails to minimize the contact area of the moving parts for optimum reduction of friction.

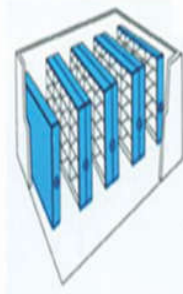

RADZY

With compactor storage we require lesser space and provides more storage in comparison to conventional rack and almirah system. With the help of this you can save 60% of space or can consume upto 100% of your storage area.

Modification is 20-25% economical as comparison to new purchase. The repairs and repainting of old racks and almirahs leaves no difference with new ones for ambience.
